

Watershed Goals-Seeing the Big Picture

How do we fund what needs to be done?

Local Projects

Groundwater Storage

- **Capacity of groundwater basins in Santa Ana River Watershed**

89.65 million AF

- **The unused capacity available for conjunctive use**

2.464 million AF

Recycled Water

- **Amount of recycled water produced**
583,000 AF per year
- **The potential**
754,000 AF projected by 2030

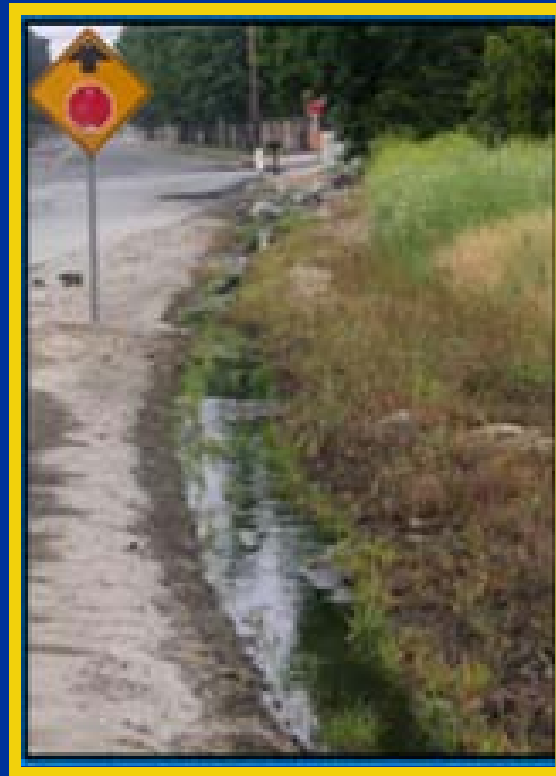

Brackish Water Desal

- **Amount of brackish water reclaimed**
70,500 AF
- **The potential**
108,000 AF projected by 2030

This must stop

Conservation

- **Amount of water being conserved in the watershed**

about 99,700 AF

- **The potential**

247,000 AF projected for 2030
